To Whom It May Concern,

Subject: Expert Validation of the Tomato Doc Application

Dear Sir/Madam,

I am writing to confirm that I have reviewed the demonstration videos of Tomato Doc, an application developed as part of an undergraduate research project at the Sri Lanka Institute of Information Technology (SLIIT).

Based on the demonstration videos and the sample inputs and corresponding outputs presented, I have assessed the application's ability to identify diseases affecting tomato leaves and fruits, detect nutrient deficiencies, and provide appropriate treatment recommendations.

During my review, I observed that the application correctly identified the demonstrated tomato leaf and fruit diseases and nutrient deficiency, and provided relevant treatment recommendations consistent with agricultural practices.

Based on my professional knowledge and experience in the agricultural sector, I consider Tomato Doc a useful and promising application with the potential to assist tomato farmers in identifying diseases, detecting nutrient deficiencies, and obtaining appropriate treatment guidance.

This validation is provided based on my professional assessment of the demonstration materials presented.

Thank you.

Yours faithfully,

M. S. M. Nifras
